Deadly Force Discretion

Speed Shooting Day 2 - Live Interactive Action

In our Speed Shooting - Day 2 course of fire, you will experience what it takes to make a lethal Shoot/Don't Shoot Decision utilizing Insight's Multi Media, "LIVE INTERACTIVE SHOOT/DON'T SHOOT SIMULATOR."

This shooting gallery "course-of-fire" is designed to take you to the next level. This program will require you to use your own judgment, as "good guys" and "bad guys" challenge you visually and verbally. As you look down range, a live interactive real-time video feed will engage you in an actual conversation with a potential adversary in REAL TIME. As these situations escalate you may, or may not be required to defend yourself.

This course is challenging, fast paced, and probably the most important class you will ever take for self-defense!

Equipment: Pistol, Holster, and 200 rounds of ammunition.
